I, the undersigned, Yi SHI, senior security auditor, confirm having been commissioned by AgileValue to conduct a penetration test of the TeamMeter application in both anonymous and authenticated modes (blackbox and greybox) to assess the application's robustness against actions performed by a malicious user.
The scope of the test was as follows: app.teammeter.com

The tests were carried out on the production environment using state-of-the-art penetration testing tools (BurpSuite Pro, Nessus) and methodology (OWASP).

These evaluation tasks took place from February 7, 2024, to February 14, 2024. The findings from the evaluation were communicated to the AgileValue teams throughout the penetration testing process in the form of daily briefings and ultimately through comprehensive reports at the end.

The work was carried out by Yi Shi – Senior Security Auditor – ISO27001 LA, OSCP, GCFA.

Sincerely,

Solidy société par action simplifiée au capital social de 1 000 euros immatriculée au RCS de Paris – 918 477 142
