

8th April 2026

**Subject: Attestation of penetration test completion**

**Scope: TeamMeter Application**

I, the undersigned, Olivier Patole, president of TRUSTABLE SAS, confirm that we have been commissioned by AgileValue company to perform a penetration test of the TeamMeter application environment in both anonymous and authenticated modes to evaluate the application's robustness against actions performed by a malicious user. The scope concerned was as follows:

- TeamMeter.io

The tests were performed on the development environment. However, since this environment is identical in scope to the production environment, the security level observed is the same as the version of the application used by TeamMeter customers. This evaluation work was carried out from 25th March to 27th March 2026, and the conclusions of the evaluation were communicated to the TeamMeter teams on the 8<sup>th</sup> of April 2026. The work was supervised by Yi Shi – Security Auditor – ISO27001 LA, OSCP, GCFA, CISSP.

Sincerely,

Olivier Patole

President – Trustable SAS
